Housed in a historic palazzo that was once the most prestigious Italian bank, our hotel fuses the splendor of fine Italian marbles and onyx with modern, spacious and hi-tech rooms.

We're a 10-minute walk to *Spanish Steps*, *Trevi Fountain* and *Villa Borghese*. Create new unforgettable memories at our restaurant, bars and spa featuring jacuzzi pool, hammam, sauna and treatments.

Indulge in moments of true contemplation at the only Cognac Lounge in the Eternal City or explore the beauty all around.

The entrance is majestic, with a white marble staircase - decorated with two marble sculptures depicting lions and placed under an arch adorned with bees and piggy banks - and introduces into the main salon, which features very high ceilings enriched by large original cipollino marble panels of the time.

And it is precisely the brightness of the marble that is the guiding thread of the architectural project of the ground floor: original marbles, recovered and restored, now interact with the new insertions, as a harmonious and welcoming whole.

The white of the Golden Sky, the deep green of cipollino marble, the yellow of indus gold and the pale green of onyx form a harmonious and restful color palette, giving the already large spaces a whole new linearity.
